(54) Title: SHORT MESSAGE FOR VOICE GROUP CALL SERVICE

(57) Abstract: The present invention relates to a method for transmitting text- and/or binary information in form of a short message in addition to voice information for a talker and at least one listener of a Voice Group Call, characterised by sending a special, dedicated signal to all listeners and to the talker. The text- and/or binary message can be sent and received simultaneous to an ongoing group call.
